Označite **Save File** i kliknite **OK** kako biste započeli s preuzimanjem WordPressa.

Nakon što ste preuzeli aplikaciju trebali biste ju otpakirati. Kliknite desnim klikom miša na datoteku koju ste preuzeli i pritisnite **Extract Here**.

Nakon što ste otpakirali datoteku, pojavit će se mapa otpakiranih Wordpress podataka kao na slici dolje:

Sljedeći korak je putem FTP-a prebaciti WP podatke na server. Ulogirajte se putem WinSCP-a koristeći svoje FTP podatke te na serveru označite mapu gdje će se kopirati WP podatci, *public\_html*.

There doesn't seem to be a wp-config.php file. I need this before we can get started.
Need more help? We got it.
You can create a wp-config.php file through a web interface, but this doesn't work for all server setups. The
safest way is to manually create the file.
Create a Configuration File

Potom kliknite na *Create a Configuration File*.

U sljedećem koraku prikazat će se informacije o stavkama potrebnim za instalaciju.

#### Kliknite na Let's Go!

omoc. <b>testiranje.net</b> /wp-admin/setup-config.php		2
	WORDPRESS	
	Welcome to WordPress. Before getting started, we need some information on the database. You will need to know the following items before proceeding.	
	<ol> <li>Database name</li> <li>Database username</li> <li>Database password</li> <li>Database bost</li> </ol>	
	<ol> <li>Database flost</li> <li>Table prefix (if you want to run more than one WordPress in a single database)</li> </ol>	
	lf for any reason this automatic file creation doesn't work, don't worry. All this does is fill in the database information to a configuration file. You may also simply open wp-config-sample.php in a text editor, fill in your information, and save it as wp-config.php.	
	In all likelihood, these items were supplied to you by your Web Host. If you do not have this information, then you will need to contact them before you can continue. If you're all ready	
	Let's go!	

Potom trebate upisati potebne podatke:

- U polje "Database Name" upišite ime kreirane baze u cPanelu
- U polje "User Name" upišite *korisničko ime*, tj. vaše pristupne podatke
- U polje "Password" upišite *lozinku*, tj. vaše pristupne podatke
- U polje "Database Host" ostavite *localhost*
- U polje "Table Prefix" promijenite u nešto proizvoljno (npr. asp\_, tbl\_, itd.)

	Below you should en	iter your database connection details. I	f you're not sure about these, contact your host.	
	Database Name	wordpress	The name of the database you want to run WP in.	
	User Name	username	Your MySQL username	
	Password	password	and your MySQL password.	
	Database Host	localhost	You should be able to get this info from your web host, if localhost does not work.	
	Table Prefix	wp_	If you want to run multiple WordPress installations in a single database, change this.	
	Submit			

Nakon što ste upisali podatke, kliknite na **Submit**.

U sljedećem koraku pod "site title" upišite **naziv stranice** (npr. domena, ne mora biti domena.com). U poljima "username" i "password" odaberite svoje **korisničko ime** i **lozinku** koje ćete koristiti za pristup WordPressu. U polje "Your E-mail" upišite svoju **kontakt e-mail adresu**.

Nakon unosa podataka kliknite na tipku **Install WordPress**.
