

Izrada sigurnosne kopije cjelokupne web stranice (*full backupa*) pomoću cPanela

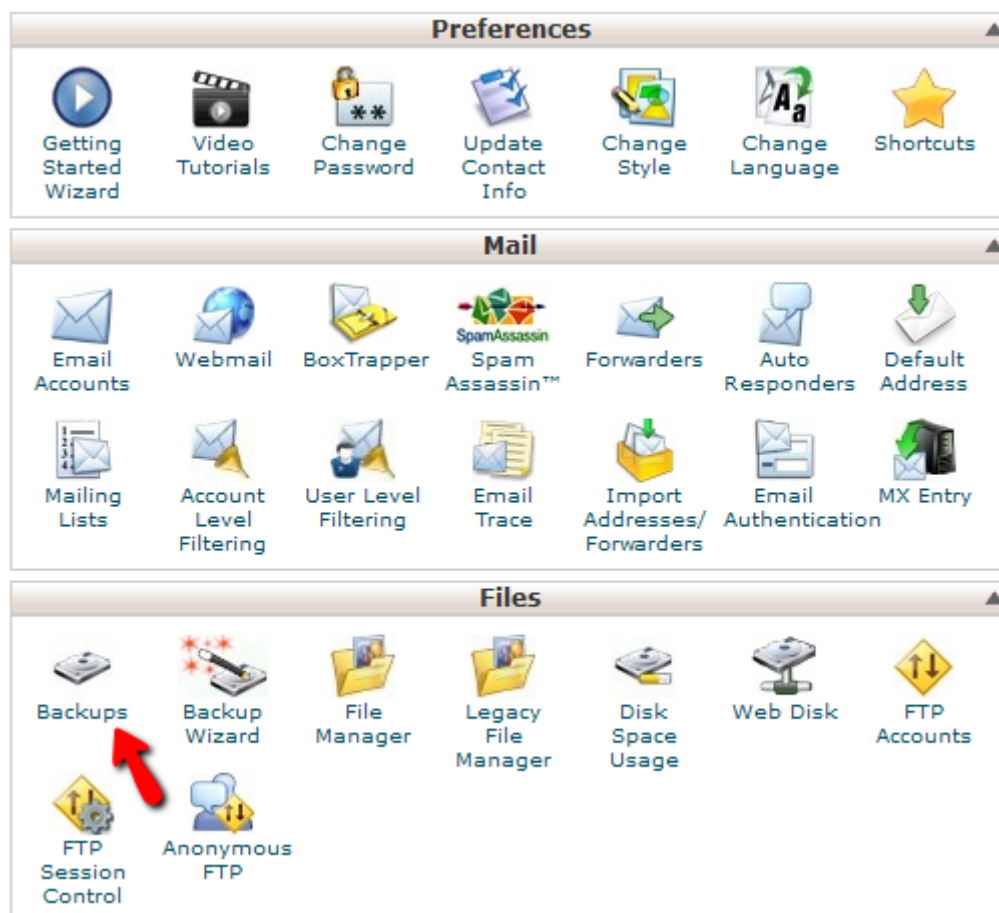

U ovim uputama u nekoliko koraka prikazano je kako možete izraditi sigurnosnu kopiju podataka svoje cjelokupne web stranice (*full backup*) pomoću cPanela. Prateći dolje navedene korake izradit ćete arhivu svih datoteka i konfiguracija svoje web stranice (uključujući home direktorij, baze podataka, konfiguraciju email forwardera i email filtera), koju zatim možete preuzeti i spremiti lokalno na svoje računalo.

Iako POSLuH redovito radi automatizirani backup svih podataka smještenih na našim poslužiteljima, ne postoji jamstvo da će svi podatci biti ispravno kopirani.

Stoga se preporučuje da sami napravite backup svojih web stranica svaki puta nakon što nešto izmijenite na stranici, kako biste uvijek imali na raspolaganju najsvježiju inačicu svojih web stranica u slučaju bilo kakvog problema. Izrada backupa pomoću cPanela jednostavna je te će Vam oduzeti samo nekoliko minuta.

1. KORAK

Nakon što ste se ulogirali u svoj cPanel, u izborniku naziva „Files“ kliknite na **Backups**, kako je prikazano na sljedećoj slici.

2. KORAK

U prozoru koji se otvorio, u dijelu pod nazivom „Full backup“ kliknite na gumb **Download or generate a full backup**, kako je prikazano na slici.

CPANEL 11

Backups

Backups allow you to download (to your computer) a zipped copy of either your entire site (including your home directory, databases, email forwarders configuration, and email filters configuration) or one of the previously mentioned parts of your site. These are not automatically scheduled backups. Automatically scheduled backups need to be enabled by the server owner/administrator.

 Video Tutorial

Full Backup

A full backup includes all of the files in your home directory, your MySQL databases, and your email forwarders and filters. You can back up your account to preserve your data, or to move your account to another cPanel server.

3. KORAK

U sljedećem prozoru možete označiti želite li na email primiti obavijest o završetku izrade backupa. Ako to želite, u polje upišite email adresu na koju želite primiti obavijest.

CPANEL 11

Full Backup

*A full backup will create an archive of all the files and configurations on your website. You can only use this to move your account to another server, or to keep a local copy of your files. You **cannot** restore full backups through your cPanel interface.*

Backups Available for Download:
No Previous Backups

Generate a Full Backup

Backup Destination: Home Directory

Email Address: backup@posluh.hr Do not send email notification of backup completion.

Ako ne želite primiti obavijest o završetku izrade backupa na email, označite **Do not send email notification of backup completion**, kao što je prikazano na slici ispod.

Backups Available for Download:
No Previous Backups

Generate a Full Backup

Backup Destination: Home Directory

Email Address: backup@posluh.hr Do not send email notification of backup completion.

4. KORAK

U istom prozoru u kojem ste označili želite li primiti obavijest o završetku izrade backupa, možete označiti i želite li izraditi backup u *Home* direktoriju ili na nekoj udaljenoj (*remote*) lokaciji.

The screenshot shows the 'Full Backup' section in cPanel 11. It includes a description of full backups, a section for 'Backups Available for Download' (showing 'No Previous Backups'), and a 'Generate a Full Backup' section. In the 'Generate a Full Backup' section, the 'Backup Destination' dropdown menu is open, showing options: 'Home Directory', 'Remote FTP Server', 'Remote FTP Server (passive mode transfer)', and 'Secure Copy (SCP)'. A red arrow points to the 'Home Directory' option. Below the dropdown are 'Generate Backup' and 'Go Back' buttons.

Najjednostavnije je kao destinaciju odabrati **Home Directory**.

5. KORAK

Nakon što ste odabrali „Home Directory“, kliknite na gumb **Generate backup**, kao što je prikazano na slici.

Klikom na **Generate backup**, otvorit će se sljedeći prozor:

CPANEL 11

Full Backup in Progress...

Once the full backup of your account has been completed, you will receive an email at the address you specified (backup@posluh.hr)

6. KORAK

Nakon dovršetka backupa, u prozoru naziva „Full backup“ ispod naslova „Backups Available for Download“, pojavit će se link na kojem se nalazi backup Vaše web stranice pored kojeg će stajati podatci o vremenu izrade backupa.

Backup Destination:

Email Address: Do not send email notification of backup completion.

Klikom na link, backup možete preuzeti i spremiti lokalno na svoje računalo. Preporučujemo da to svakako učinite, jer ostavljanjem backupa na poslužitelju trošite zakupljeni diskovni prostor. Osim toga, sigurnosnu kopiju podataka bolje je čuvati na drugoj lokaciji.
